Introduction

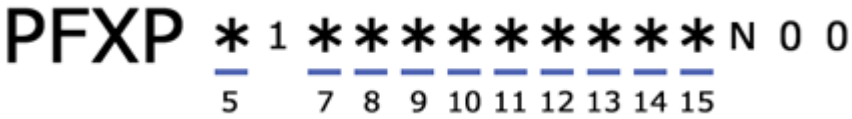
This document introduces the procedures and notes for replacing the PL-3900T with the PS-4800.
The recommended substitute model is listed below.

Equipment in use	Recommended substitute model
PL-3900T *1 (2 slots, Core™ Duo model) Model code: APL3900-TA/TD	**PS-4800** (2 slots, Core™ 2 Duo model) Model code: PFXPP182C******N00
PL-3900T *1 (2 slots, Celeron® model) Model code: APL3900-TA/TD	**PS-4800** (2 slots, Atom™ model) Model code: PFXPP182B******N00

*1 Sales terminated as of September 2012

Interpreting the PS-4000 Series Model Code

A portion of the PS-4000 Series model code differs according to the specification. When purchasing the PS-4000 Series, carefully check the model code to order before making your purchase.



* The gray-shaded cells in the table cannot be selected with the models (PS-4800) introduced in this document.

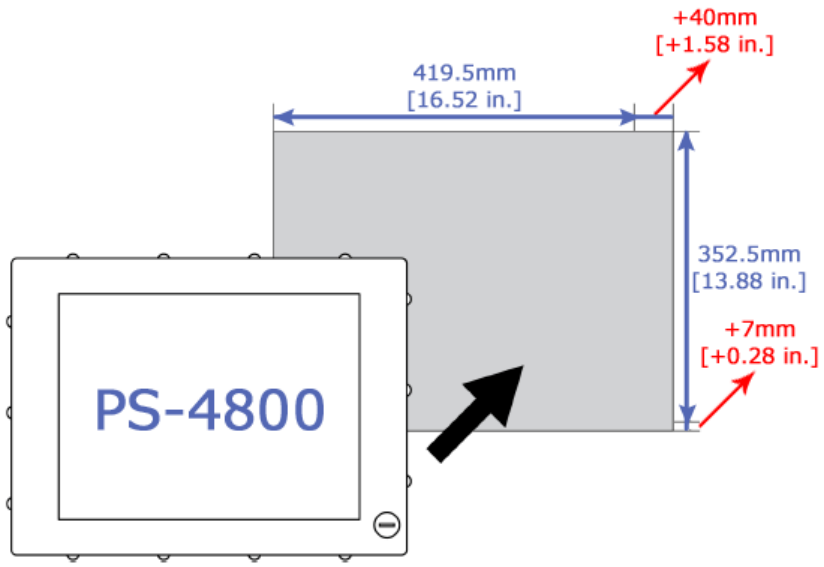
2.2 Main memory

The memory in the PS-4800 cannot be upgraded by the customer after it is purchased. The amount of memory selected in the built-in shipping options is the maximum amount of memory. For example, models with a maximum amount of memory of 8 GB in their specification cannot be upgraded with additional memory if they have been purchased with 4 GB specified in the built-in shipping options. Please use caution when ordering. →5.4 Exclusive BTO (build to order) options

2.3 Panel cut dimensions

The panel cut dimensions for the PS-4800 differ from those of the PL-3900T. During replacement, installation hole fabrication will be required.



2.4 Intelligent fan control

The fan speed for PS-4800 models equipped with a fan is controlled according to the internal temperature. The fan does not operate until the internal temperature reaches a specific temperature.

2.5 Battery backup UPS (DC power supply models only)

By equipping the PS-4800 with a UPS battery unit, power can continue to be supplied even when there is a loss of power due to a power failure and running programs can be correctly terminated by the UPS software.
To connect a UPS battery unit, specify "B" or "G" for the 10th digit of the model code in the built-in shipping options. Please note that the option cannot be installed after purchase. →5.4 Exclusive BTO (build to order) options

2.6 Serial interfaces

One additional serial interface port can be added to the PS-4800 that corresponds to the communication method (RS-232/422/485). To add an additional port, specify "4" for the 15th digit of the model code in the built-in shipping options. An additional port cannot be added after purchase. Please use caution when ordering. →5.4 Exclusive BTO (build to order) options
To perform RS-422/485 communication with the additional serial interface, software is required to switch the RTS lines each time the driver sends or receives data. The RTS lines are not switched automatically.
The PS-4800 also uses COM3 internally as the touch panel interface. When adding additional COM ports with expansion boards or USB-SIO, do not use COM3.

2.7 USB interface

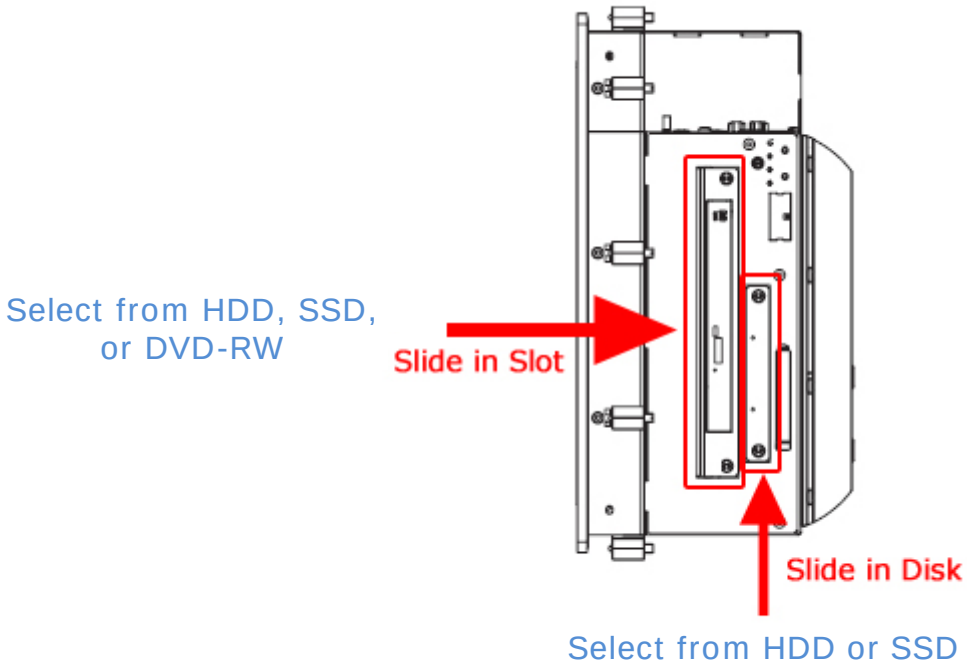
The PL-3900T can be configured not to use the front USB port with the DIP switches, but the PS-4800 does not have this setting.

2.8 PCI slots

Certain PS-4800 models are equipped with PCI Express. If you wish to replace a PCI 1 slot/PCI Express (x4)* 1 slot model, specify "2" for the 8th digit of the model code in the built-in shipping options. * The number in parentheses indicates the number of PCI Express lanes.

2.9 DVD-RW drive

The DVD-RW drive is connected to the slide-in slot. When an HDD or SSD is connected to the slide-in slot, the DVD-RW drive cannot be used. Separately prepare a commercially available DVD drive that can connect via USB.



2.10 External HDD, SSD, USB devices

When an external HDD, SSD, or USB device is connected to a PS-4800 pre-installed with Microsoft Windows Embedded Standard, the system will no longer start. In this situation, the system can be made to start with the device connected to it by configuring the setting below in the BIOS boot menu. The setting depends on the CPU as shown below.

CPU	BIOS setting
Core™ 2 Duo	Change [1st Boot Device] setting to "Fourth Master"
Atom™	Change [1st Boot Device] setting to "Secondary Master"

*The notes above are included with models pre-installed with Microsoft Windows® Embedded Standard.

2.11 Power supply plug

Caution: The power line terminal locations for the power supply plug differ between the PL-3900T and the PS-4800.

	PL-3900T	PS-4800
AC power supply		DC power supply		
2.12 Power consumption

The power consumption does not include the value of power supplied to devices in the provided expansion slots and to USB devices. The maximum power consumption of the entire product including the value of supplied power is 130 W.

4.3 Supported software

The software that the PS-4800 supports is listed below.

Software	Software mirroring (APL-SM3000)	x
	WinGP *1	✓
Utilities	System Monitor	✓
	Touch panel driver *2	✓
	Keyboard emulator *3	✓
	Remote shutdown	x
	EWF Setting Tool *4	✓
	XP Embedded CF card backup/recovery tool *5	x
	Lang Shell *6	x
	Language selection Shell update *7	✓
API-DLL *8	System Monitor	x
	EWF	x

*1 When WinGP was installed on the PL-3900T and RS-422/485 communication was being performed, the PL-3900T cannot be replaced with the PS-4800 as is.
→See 2.6
*2 The PL-3900T driver is DMC's UPDD, but the PS-4800 uses software called Touch Screen.
Please be aware that right click operations change to touch and hold.
The touch sound is also issued when the finger is lifted from the screen, not when the screen is pressed.
*3 Use the user assistance screen keyboard standard in Windows® 7 Ultimate and Windows® Embedded Standard 7.
*4 The PL-3900T was RAM mode, but the PS-4800 changes to RAM REG.
*5 The PL-3900T had a dedicated tool, but the PS-4800 does not support it.
When backup/recovery is required, prepare a normal tool (commercially available product, free software).
*6 Can be configured with the Windows® Embedded Standard 7 standard function.
*7 Only supported by Windows® Embedded Standard 7.
*8 API-DLL is not supported.

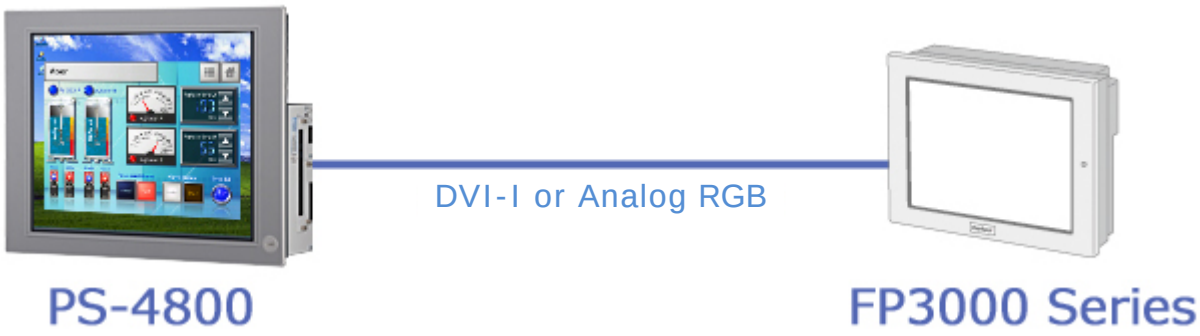
Chapter 5. Appendix

5.1 FP-3000 Series

5.1.1 Connection with the PS-4800

The PS-4800 can connect to the FP-3000 Series by DVI* or analog RGB. PS-4800 images can also be output to a separate location.

* Its Rev.2 or later of FP3000 Series supports DVI



5.1.2 Remote installation distances and cables

The distances the FP-3000 Series can be remotely installed and the cables that support those distances are listed below.

Cable		Model code
5 m	Analog RGB	CA7-CBLCVRGB-01 or CA7-CBLCDVI-D/RGB-01 + FP-CV02-45
	DVI	FP-DV01-50 *1
	USB	FP61V-IS00-O or FP-US00
10 m	DVI	PFXZPBCBDV101 *2

*1 To connect the FP-3000 Series to the PS-4000 Series, only revision "2" FPs with the symbol can be used.
*2 The maximum cable length for DVI standard is 5m. Because the 10m cable is non-standard, the exact performances is not guaranteed. According to environment or equipment configuration, video images may not be displayed properly, so be sure to check performances every time environment or equipment configuration is changed. A 5m cable is recommended when using in SXGA resolution or higher.

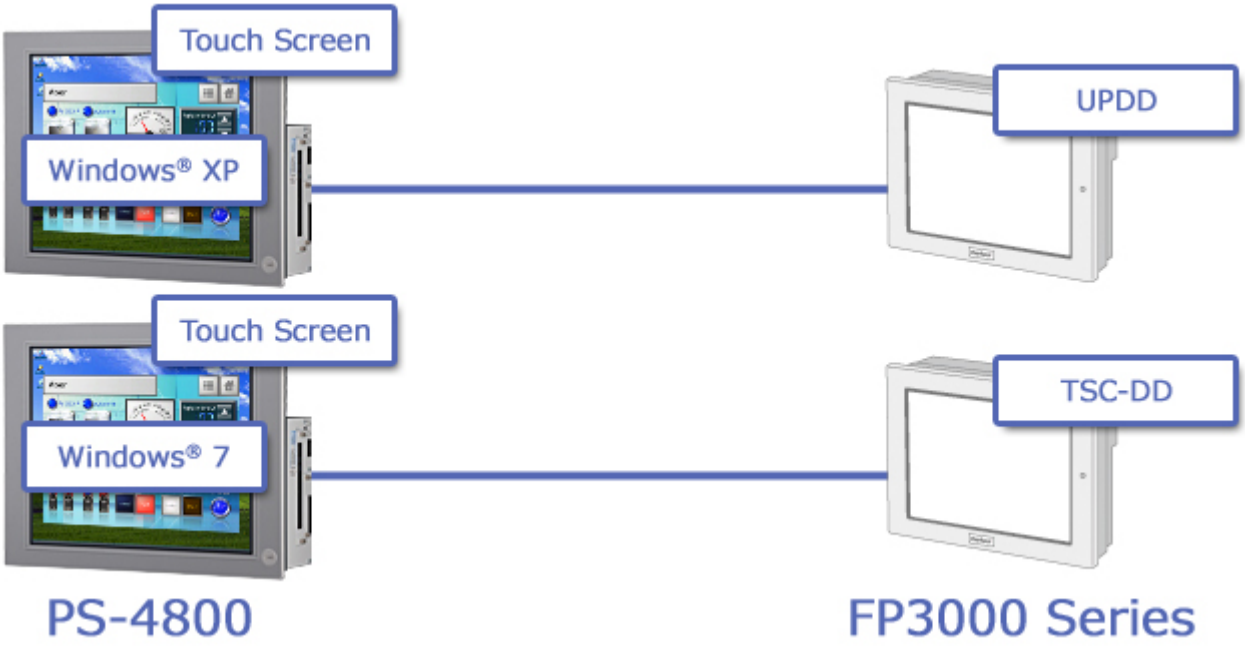
5.1.3 Required touch panel driver

The required touch panel driver for each monitor is listed below.

OS	PS-4000 Series	FP-3000 Series		
	PS-4700/4800	FP-3710T	FP-3710K/FP-3900T	FP-3600T *1/ FP-3650T
WinXP JP, WinXP ML, WES2009	Touch Screen	UPDD		
Win7, WES7		TSC-DD		

*1 Win7 and WES7 do not officially support a SVGA (800 x 600 pixels) resolution, but we have verified that the screen is displayed without problems.

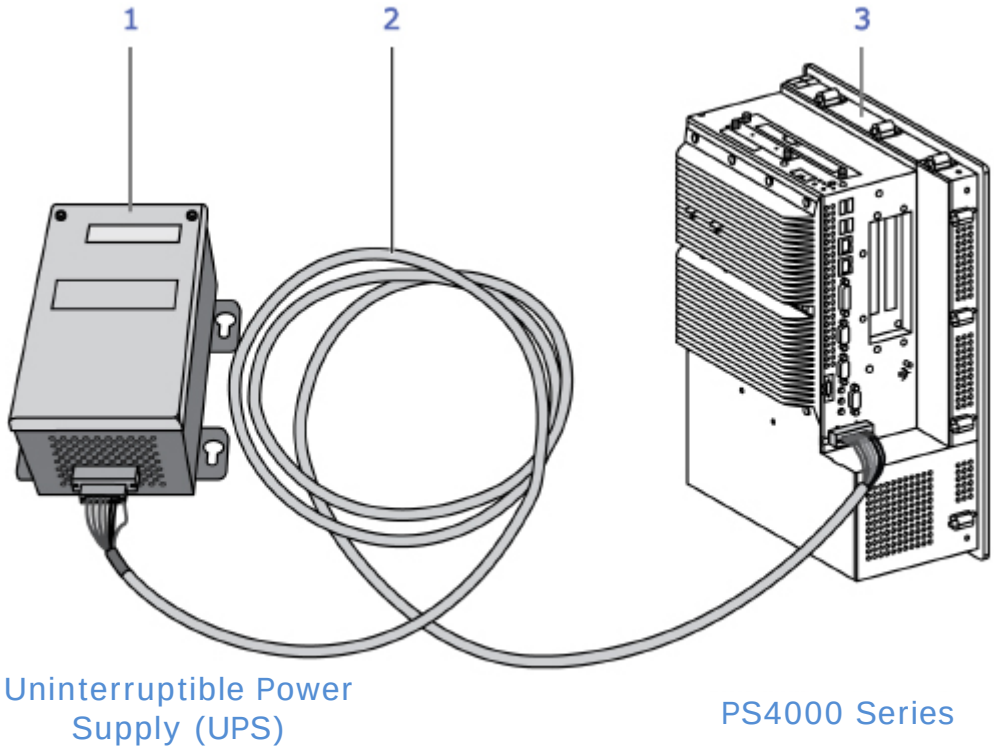
WinXP JP	Windows® XP Professional Japanese
WinXP ML	Windows® XP Professional Multi-Language
WES2009	Windows® Embedded Standard 2009
WES7	Windows® Embedded Standard 7
Win7	Windows® 7 Ultimate



5.2 Uninterruptible power supply (UPS)

5.2.1 Overview

The uninterruptible power supply (UPS) option can only be used with DC power supply types. The diagram below shows the PS-4000 Series with an attached UPS.



1: UPS battery unit (model code: PFXZPSEUUPB1)
2: UPS connection cable 3 m (model code: PFXZPSCBUP3)
3: PS-4000 Series equipped with the UPS interface board (installed when shipped*)

Primary features of the UPS option:

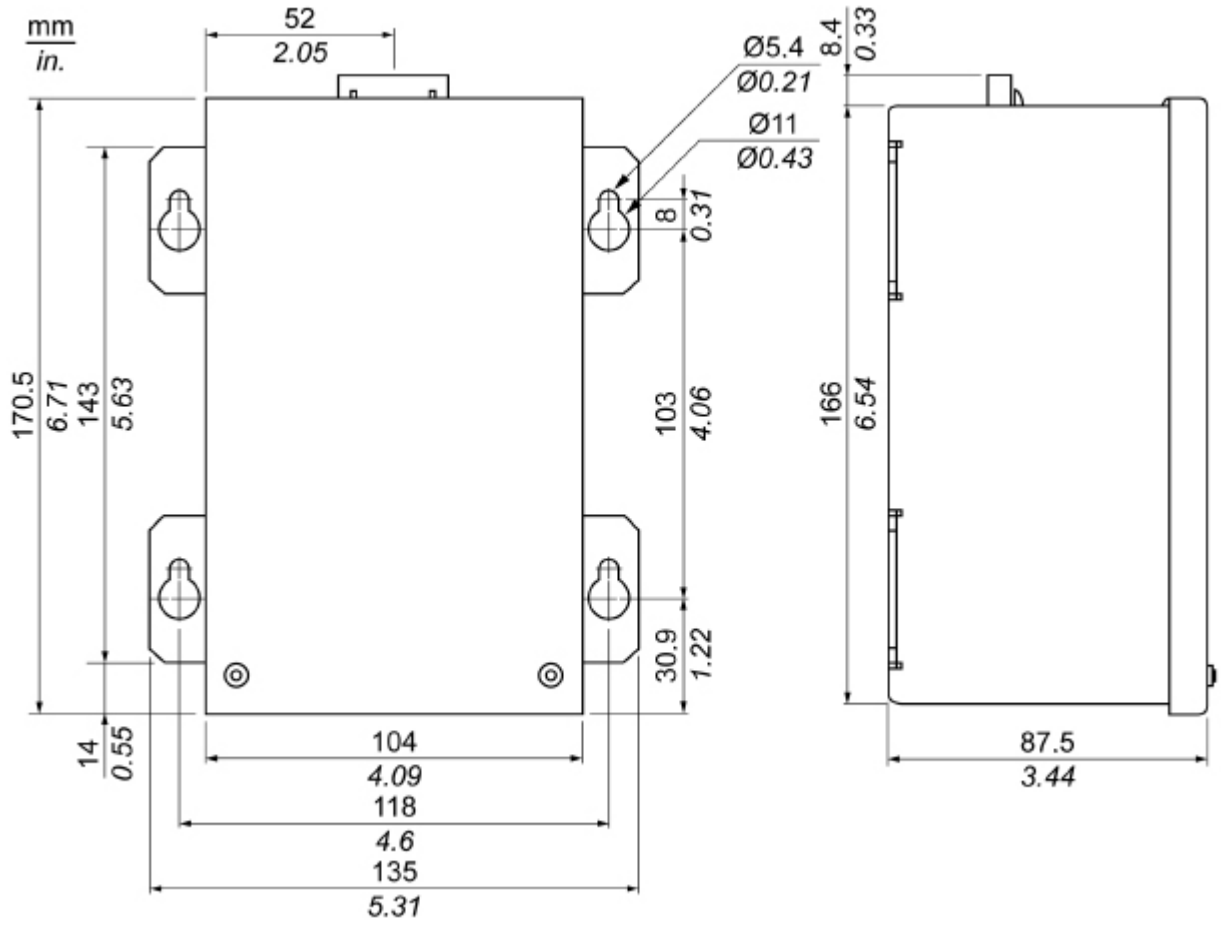
- Rechargeable battery that is maintenance free and lasts a long time
- Communication over the built-in interface
- Temperature sensor
- Over discharge protection

* You must specify "B" for the 10th digit of the model code in the built-in shipping options. Please note that the option cannot be installed after purchase.

5.2.2 Specifications

Main power supply/battery powered switching threshold	15 / 13 V
Power failure backup time	20 minutes maximum (at 150 W load)
Charging current	0.5 A maximum
Over discharge protection	10 V on battery unit
Short circuit protection	None
Power consumption	7.5 W maximum
Status indicator	Displayed in System Monitor utility
Configuration	Configured with System Monitor utility

5.2.3 Dimensions



5.3 INtime OS

The PS-4800 supports the INtime OS.
