Connection
Guide

This cable should only be used with the designated operator interfaces. Do not use it with other models.

Reference

For information about printer commands and connection methods to your operator interface, refer to that unit's User Manual.

■ When Connecting the Cable

1. Confirm that the printer and operator interface's power are both turned OFF.
2. Connect one end of the cable to the printer's parallel port.
3. Connect the other end of the cable to the operator interface's printer interface.

Note: Be sure to insert each connector in until it locks (clicks) into place.
